DETAILED ACTION

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

 Claims 1-8 rejected under 35 U.S.C. 102(e) as being anticipated by Yashohara et al (US 7362061).

Claims 1,3,7: A motor drive circuit comprising: a PWM voltage generation circuit (50) for generating a PWM voltage; and a PWM drive circuit (20) for driving a motor based on the PWM voltage outputted from the PWM voltage generation circuit (50), wherein the PWM drive circuit includes a load driving field-effect transistor (2a), a through rate control portion (3a1/3a2) for reducing a through rate of a voltage based on the PWM voltage and then feeding the resultant voltage to a gate of the load driving field-effect transistor, and a gate voltage control portion (3a5) for stopping an operation of the through rate control portion and pulling up or down a gate potential of the load driving field-effect transistor to a predetermined value upon detecting during a transition period of a gate voltage of the load driving field-effect transistor that an output voltage of the load driving field-effect transistor has almost been inverted and become approximately equal to a value obtained when the load driving field-effect transistor is completely on (col. 6:45-7:26).

Application/Control Number: 10/599,845

Art Unit: 2837

Claims 2,4,8: as a result of detection of the PWM voltage and the output voltage of the load driving field-effect transistor, only when a value of the PWM voltage is found to be at a level at which the load driving field-effect transistor is turned on and the output voltage of the load driving field-effect transistor is found to be approximately equal to a value obtained when the load driving field-effect transistor is completely on, the gate voltage control portion stops the operation of the through rate control portion and pulls up or down the gate potential of the load driving field-effect transistor to the predetermined value (col. 6:45-7:26; col. 9:55-11:5).

Claims 5-6: a PWM generation circuit generates the PWM voltage according to a rotor position of the motor (col. 10:14-25).

Response to Arguments

 Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RENATA MCCLOUD whose telephone number is (571)272-2069. The examiner can normally be reached on Mon.- Fri. from 5:30 am - 2pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Walter Benson can be reached on (571) 272-2800 ext. 37. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Renata McCloud/ Examiner, Art Unit 2837
